

# THE ROAM TRIAL

## NEWSLETTER

[www.roam-trial.org.uk](http://www.roam-trial.org.uk)

### Current progress

The ROAM trial has **45 patients!** A huge congratulations to those sites that have recruited in to this rare disease trial. Please continue to keep an eye out for eligible patients at MDT meetings, and complete your screening logs.

### Information Study

We now have 38 patients consented to the ROAM Information Study! This study has helped inform resources designed to improve clinical communication and trial recruitment. Thank you for your continued support.

### More information for patients

If your patients would like some more information about ROAM, please direct them to the ROAM website. Here, they can watch a short video about the trial, and hear about a real-life experience of radiotherapy.

### Further support for recruiters

If you have new members in your team, or would like some additional tips on optimising your recruitment consultations, the ROAM webinar is now available on the website. Simply go to 'Information for Sites/Clinicians.'

### ROAM at SBNS

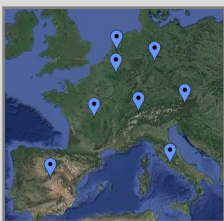

Michael Jenkinson will be attending the SBNS & ABN Joint Meeting if you would like to know more about ROAM. Alternatively, you can email him at [michael.jenkinson@liv.ac.uk](mailto:michael.jenkinson@liv.ac.uk).
